QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended May 31, 2016

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File No. 1-11288

ACTUANT CORPORATION

(Exact name of registrant as specified in its charter)

Wisconsin
(State of incorporation)

39-0168610
(I.R.S. Employer Id. No.)

**N86 W12500 WESTBROOK CROSSING
MENOMONEE FALLS, WISCONSIN 53051**
Mailing address: P. O. Box 3241, Milwaukee, Wisconsin 53201
(Address of principal executive offices)
(262) 293-1500
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "accelerated filer," "large accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act.): Yes No

The number of shares outstanding of the registrant's Class A Common Stock as of June 30, 2016 was 58,928,350.

FORWARD LOOKING STATEMENTS AND CAUTIONARY FACTORS

This quarterly report on Form 10-Q contains certain statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that involve risks and uncertainties. Such forward-looking statements include statements regarding expected financial results and other planned events, including, but not limited to, anticipated liquidity, and capital expenditures. Words such as “may,” “should,” “could,” “anticipate,” “believe,” “estimate,” “expect,” “plan,” “project” and similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict. Therefore, actual future events or results may differ materially from these statements. We disclaim any obligation to publicly update or revise any forward-looking statements as a result of new information, future events or any other reason.

The following is a list of factors, among others, that could cause actual results to differ materially from the forward-looking statements:

- economic uncertainty or a prolonged economic downturn;
- challenging end market conditions in the industrial, oil & gas, energy, power generation, infrastructure, commercial construction, truck, automotive, specialty vehicle, mining and agriculture industries;
- failure to realize anticipated cost savings from restructuring activities and cost reduction efforts;
- increased competition in the markets we serve and market acceptance of existing and new products;
- our ability to successfully identify and integrate acquisitions and realize anticipated benefits/results from acquired companies;
- operating margin risk due to competitive pricing, operating inefficiencies, reduced production levels and material, labor and overhead cost increases;
- our international operations present special risks, primarily from currency exchange rate fluctuations, exposure to local economic and political conditions, export and import restrictions and controls on repatriation of cash;
- regulatory and legal developments including changes to United States taxation rules, conflict mineral supply chain compliance, environmental laws and governmental climate change initiatives;
- the potential for a non-cash asset impairment charge, if operating performance or the outlook at one or more of our businesses were to fall significantly below current levels;
- our ability to execute our share repurchase program, which depends in part, on our free cash flow, liquidity and changes in the trading price of our common stock;

Table of Contents

- a significant failure in information technology (IT) infrastructure and systems, unauthorized access to financial and other sensitive data or cybersecurity threats;
- litigation, including product liability and warranty claims;
- inadequate intellectual property protection or if our products are deemed to infringe on the intellectual property of others;
- our level of indebtedness, ability to comply with the financial and other covenants in our debt agreements and fluctuations in interest rates; and
- numerous other matters including those of a political, economic, business, competitive and regulatory nature contained from time to time in U.S. Securities and Exchange Commission ("SEC") filings, including, but not limited to, those factors listed in the "Risk Factors" section within Item 1A of Part I of the Form 10-K filed with the SEC on October 28, 2015.

When used herein, the terms "Actuant," "we," "us," "our" and the "Company" refer to Actuant Corporation and its subsidiaries. Actuant Corporation provides free-of-charge access to its Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments thereto, through its website, www.actuant.com, as soon as reasonably practical after such reports are electronically filed with the SEC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Basis of Presentation

General

The accompanying unaudited condensed consolidated financial statements of Actuant Corporation (“Actuant,” or the “Company”) have been prepared in accordance with generally accepted accounting principles for interim financial reporting and with the instructions of Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. The condensed consolidated balance sheet data as of August 31, 2015 was derived from the Company’s audited financial statements, but does not include all disclosures required by United States generally accepted accounting principles. For additional information, including the Company’s significant accounting policies, refer to the consolidated financial statements and related footnotes in the Company’s fiscal 2015 Annual Report on Form 10-K.

In the opinion of management, all adjustments considered necessary for a fair statement of financial results have been made. Such adjustments consist of only those of a normal recurring nature. Operating results for the three and nine months ended May 31, 2016 are not necessarily indicative of the results that may be expected for the entire fiscal year ending August 31, 2016.

New Accounting Pronouncements

In November 2015, the FASB issued ASU 2015-17, *Balance Sheet Classification of Deferred Taxes*, which amends the existing guidance to require presentation of deferred tax assets and liabilities as non-current within a classified statement of financial position. This guidance was adopted, on a prospective basis, at November 30, 2015. The adoption did not have a material impact on the financial statements of the Company.

In April 2015, the FASB issued ASU 2015-03, *Simplifying the Presentation of Debt Issuance Costs*, which includes amendments that require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. Under the new guidance, the recognition and measurement of debt issuance costs is not affected. This guidance is effective for fiscal years beginning on or after December 15, 2015. The adoption of this standard in fiscal 2017 is not expected to have a material impact on the financial statements of the Company.

In September 2015, the FASB issued ASU 2015-16, *Simplifying the Accounting for Measurement-Period Adjustments*, which eliminates the requirement to retrospectively account for changes to provisional amounts initially recorded in a business acquisition opening balance sheet. This guidance is effective for fiscal years beginning after December 15, 2015 (fiscal 2017 for the Company), including interim periods within fiscal years. The adoption of this standard is not expected to have a material impact on the financial statements of the Company.

In March 2016, the FASB issued ASU 2016-09, *Stock Compensation: Improvements to Employee Share-Based Payment Accounting*, which will simplify several aspects of accounting for share-based payment transactions. The guidance will require, among other items, that all excess tax deficiencies or benefits be recorded as income tax expense or benefit in the statement of earnings, and not in additional paid-in capital (shareholder’s equity). This guidance is effective for fiscal years beginning after December 15, 2016 (fiscal 2018 for the Company), and interim periods within those annual periods. Early adoption is permitted and the prospective transition method should be applied. The Company is currently evaluating the impact of adopting this standard.

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers*. Under ASU 2014-09, an entity will recognize revenue when it transfers promised goods or services to customers in an amount that reflects what it expects in exchange for the goods or services. It also requires more detailed disclosures to enable users of financial statements to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. This guidance is effective for fiscal years beginning on or after December 15, 2017 (fiscal 2019 for the Company). The Company is currently evaluating the impact of adopting this standard.

In February 2016, the FASB issued ASU 2016-02, *Leases* to increase transparency and comparability among organizations by recognizing all lease transactions (with terms in excess of 12 months) on the balance sheet as a lease liability and a right-of-use asset. This guidance is effective for fiscal years beginning after December 15, 2018 (fiscal 2020 of the Company), including interim periods within those fiscal years. Upon adoption, the lessee will apply the new standard retrospectively to all periods presented or retrospectively using a cumulative effect adjustment in the year of adoption. The Company is currently evaluating the impact of adopting this standard.

Significant Accounting Policies

Financing Costs: Financing costs represent interest expense, financing fees and amortization of debt issuance costs net of interest income. Interest income was \$0.4 million and \$1.4 million for the three and nine months ended May 31, 2016 respectively, compared to \$0.5 million and \$1.4 million in the comparable prior year periods.

Table of Contents

Restructuring: The Company has committed to various restructuring initiatives including workforce reductions, plant consolidations to reduce manufacturing overhead, satellite office closures, the continued movement of production and product sourcing to low cost alternatives and the centralization and standardization of certain administrative functions. Total restructuring charges for these activities were \$3.5 million and \$11.5 million, for the three and nine months ended May 31, 2016, respectively. Liabilities for severance will be paid during the next twelve months, while facility consolidation costs (primarily reserves for future lease payments related to vacated facilities) will be paid over the underlying remaining lease terms.

The following rollforward summarizes current year restructuring activities, by segment, for the nine months ended May 31, 2016 (in thousands):

	Industrial	Energy	Engineered Solutions	Corporate	Total
Balance as of August 31, 2015	\$ —	\$ —	\$ —	\$ —	\$ —
Restructuring charges	1,792	4,877	4,528	261	11,458
Cash payments	(1,000)	(1,122)	(2,182)	(200)	(4,504)
Other non-cash uses of reserve	—	(170)	(304)	(1)	(475)
Impact of changes in foreign currency rates	17	(14)	18	—	21
Balance as of May 31, 2016	<u>\$ 809</u>	<u>\$ 3,571</u>	<u>\$ 2,060</u>	<u>\$ 60</u>	<u>\$ 6,500</u>

Goodwill and Long-Lived Assets: The Company's goodwill is tested for impairment annually, in the fourth quarter, or more frequently if events or changes in circumstances indicate that goodwill might be impaired. The Company generally utilizes a discounted cash flow model to estimate the fair value of reporting units, which is dependent on a number of assumptions including estimated future revenues and expenses, weighted average cost of capital, capital expenditures and other variables. The fair value of the reporting unit is then compared to its carrying amount, including goodwill. If the carrying value of the reporting unit exceeds its fair value, the goodwill is potentially impaired and the Company then determines the implied fair value of goodwill, which is compared to the carrying value to determine if an impairment charge is required.

Indefinite lived intangible assets (tradenames) are also subject to an impairment review. On an annual basis, or more frequently if events or changes in circumstances indicate that indefinite lived intangible assets might not be recoverable, the fair value of the indefinite lived intangible assets, using a relief of royalty valuation approach, are compared to the carrying value to determine if an impairment charge is required.

Intangible assets with definite lives consist primarily of customer relationships, patents, trademarks and non-compete agreements while fixed assets include building improvements, rental assets (Energy segment) and machinery & equipment. The Company reviews these long-lived assets for impairment when events or changes in business circumstances indicate that the carrying amount of the assets may not be fully recoverable. If such indicators are present, the Company prepares an undiscounted operating cash flow analyses to determine if an impairment exists. If an impairment is determined to exist, any related impairment loss is recorded based on fair value.

A considerable amount of management judgment and assumptions are required in performing the impairment tests, principally in determining the fair value of each reporting unit, intangible asset or fixed asset. While management believes the judgments and assumptions utilized in the fair value models are reasonable, different assumptions or adverse market developments could change the estimated fair values and ultimately result in future impairment charges.

As discussed in Note 3, "Goodwill and Other Intangible Assets," the Company recognized a \$186.5 million and \$84.4 million impairment charge in the second quarter of fiscal 2016 and 2015, respectively.

Note 2. Acquisitions

During fiscal 2016 the Company completed two acquisitions which resulted in the recognition of goodwill in the condensed consolidated financial statements because their purchase price reflected the future earnings and cash flow potential of the acquired companies, as well as the complementary strategic fit and resulting synergies the acquisitions are expected to bring to existing operations. The Company makes an initial allocation of the purchase price at the date of acquisition, based upon its understanding of the fair value of the acquired assets and assumed liabilities. If additional information is obtained about these assets and liabilities within the measurement period (not to exceed one year from the date of acquisition), through asset appraisals and other sources, the Company will refine its estimates of fair value and adjust the initial purchase price allocation.

The Company acquired the stock of Larzep, S.A. ("Larzep") on February 17, 2016 for a purchase price of \$15.9 million net of cash acquired. This Industrial segment tuck-in acquisition is headquartered in Mallabia, Spain and is a supplier of hydraulic tools and solutions. The preliminary purchase price allocation resulted in \$9.7 million of goodwill (which is not deductible for tax purposes) and \$4.8 million of intangible assets, including \$3.6 million of customer relationships and \$1.2 million of tradenames. During the third

Table of Contents

quarter of fiscal 2016, goodwill related to this acquisition increased by \$2.5 million, the result of purchase accounting adjustments to reflect the fair value of acquired assets and liabilities.

The Company acquired the assets of the Middle East, Caspian and the North African business of FourQuest Energy Inc. for \$64.3 million on March 30, 2016. This Hydratight tuck-in acquisition was funded with existing cash and expands the geographic presence and service offerings of the Energy segment, including pipeline pre-commissioning, engineering, chemical cleaning and leak testing. The preliminary purchase price resulted in \$35.4 million of goodwill (which is not deductible for tax purposes) and \$8.7 million of intangible assets, including \$8.0 million of customer relationships and \$0.7 million of non-compete agreements.

The two acquisitions generated combined sales of \$7.3 million for the three months ended May 31, 2016. The Company incurred acquisition transaction costs of \$1.3 million and \$2.7 million, for three and nine months ended May 31, 2016 respectively, related to various business acquisition activities (compared to less than \$0.1 million for the comparable prior year periods).

The following unaudited pro forma operating results of the Company for the three and nine months ended May 31, 2016 and 2015, give effect to these acquisitions as though the transactions and related financing activities occurred on September 1, 2014 (in thousands, except per share amounts):

Note 3. Goodwill and Other Intangible Assets

Fiscal 2015 Interim Impairment Charges

The Cortland and Viking businesses (Energy segment) provide products and services to the global energy markets where safety, reliability, up-time and productivity are key value drivers. The dramatic decline in oil prices in 2015 caused a slowdown in upstream oil & gas activity as asset owners hesitated on starting new oil & gas exploration drilling and development projects, while certain existing projects were deferred or canceled and capital spending was reduced. As a result of these unfavorable market conditions, in the second quarter of fiscal 2015 the Company recognized an \$84.4 million impairment charge related to the write-down of goodwill and indefinite lived intangible assets of the Cortland and Viking businesses. The impairment charge, as a result of lower projected near-term sales and profits, consisted of a \$78.0 million impairment of goodwill and \$6.4 million impairment of indefinite lived intangible assets (tradenames).

Fiscal 2016 Interim Impairment Charges

The prolonged unfavorable conditions in the global oil & gas markets, including additional cuts in projected capital spending by energy customers, reduced exploration, drilling and commissioning activities and excess capacity in the industry (given continued low oil & gas prices) are expected to have an adverse impact on the future financial results of the Cortland and Viking businesses. Accordingly, during the second quarter of fiscal 2016, the Company recognized a \$140.8 million impairment charge (as a result of lower projected future sales and profits) related to the Cortland and Viking businesses.

The maximatecc business (Engineered Solutions segment), including the legacy North American business and the CrossControl (Europe) and Turotest (South America) acquisitions, manufactures severe-duty electronic instrumentation including displays and clusters, machine controls and sensors. Weakness in off-highway vehicle and agricultural markets, coupled with challenging overall

[Table of Contents](#)

industrial fundamentals, recent reductions in OEM customer build rates and production schedules (in order to reduce inventory levels) and delays in the start of production by certain European OEMs for new or updated design models have resulted in reduced sales and profitability of the maximatecc business. As a result of lower projected sales and profits, during the second quarter of fiscal 2016, the Company recognized a \$45.7 million impairment charge related to the goodwill and intangible assets of the maximatecc business.

A summary of the second quarter fiscal 2016 impairment charge by reporting unit is as follows (in thousands):

	Cortland	Viking	maximatecc	Total
Goodwill	\$ 34,502	\$ 39,099	\$ 44,521	\$ 118,122
Indefinite lived intangible assets	2,211	13,289	1,153	16,653
Amortizable intangible assets	—	27,952	—	27,952
Fixed assets	—	23,784	—	23,784
	<u>\$ 36,713</u>	<u>\$ 104,124</u>	<u>\$ 45,674</u>	<u>\$ 186,511</u>

The changes in the carrying value of goodwill for the nine months ended May 31, 2016 are as follows (in thousands):

	Industrial	Energy	Engineered Solutions	Total
Balance as of August 31, 2015	\$ 92,107	\$ 236,450	\$ 279,699	\$ 608,256
Business acquisitions	9,718	35,403	—	45,121
Impairment charge	—	(73,919)	(44,543)	(118,462)
Impact of changes in foreign currency rates	(97)	(4,493)	(904)	(5,494)
Balance as of May 31, 2016	<u>\$ 101,728</u>	<u>\$ 193,441</u>	<u>\$ 234,252</u>	<u>\$ 529,421</u>

The gross carrying value and accumulated amortization of the Company's other intangible assets are as follows (in thousands):

	Weighted Average Amortization Period (Years)	May 31, 2016			August 31, 2015		
		Gross Carrying Value	Accumulated Amortization	Net Book Value	Gross Carrying Value	Accumulated Amortization	Net Book Value
Amortizable intangible assets:							
Customer relationships	14	\$ 307,400	\$ 170,027	\$ 137,373	\$ 302,518	\$ 132,007	\$ 170,511
Patents	10	30,700	21,830	8,870	30,899	19,928	10,971
Trademarks and tradenames	18	21,233	7,658	13,575	21,604	7,055	14,549
Other intangibles	3	6,755	5,880	875	6,790	6,496	294
Indefinite lived intangible assets:							
Tradenames	N/A	95,228	—	95,228	112,437	—	112,437
		<u>\$ 461,316</u>	<u>\$ 205,395</u>	<u>\$ 255,921</u>	<u>\$ 474,248</u>	<u>\$ 165,486</u>	<u>\$ 308,762</u>

The Company estimates that amortization expense will be \$5.6 million for the remaining three months of fiscal 2016. Amortization expense for future years is estimated to be: \$21.3 million in fiscal 2017, \$21.0 million in 2018, \$20.7 million in fiscal 2019, \$19.9 million in fiscal 2020, \$18.8 million in fiscal 2021 and \$53.4 million thereafter. The future amortization expense amounts represent estimates and may be impacted by potential future acquisitions, divestitures, impairment charges, changes in foreign currency exchange rates and other factors.

Note 4. Product Warranty Costs

The Company generally offers its customers a warranty on products they purchase, although warranty periods vary by product type and application. The reserve for future warranty claims is based on historical claim rates and current warranty cost experience. The following is a rollforward of the product warranty reserve (in thousands):

	Nine Months Ended May 31,	
	2016	2015
Beginning balance	\$ 3,718	\$ 4,056
Provision for warranties	3,225	4,198
Warranty reserve for acquired businesses	3	—
Warranty payments and costs incurred	(3,155)	(3,505)
Impact of changes in foreign currency rates	(35)	(589)
Ending balance	<u>\$ 3,756</u>	<u>\$ 4,160</u>

Note 5. Debt

The following is a summary of the Company's long-term indebtedness (in thousands):

	May 31, 2016	August 31, 2015
Senior Credit Facility		
Revolver	\$ —	\$ —
Term Loan	300,000	300,000
Total Senior Credit Facility	300,000	300,000
5.625% Senior Notes	288,059	288,059
Total Senior Indebtedness	588,059	588,059
Less: current maturities of long-term debt	(15,000)	(3,750)
Total long-term debt, less current maturities	<u>\$ 573,059</u>	<u>\$ 584,309</u>

The Company's Senior Credit Facility, which matures on May 8, 2020, includes a \$600.0 million revolver, a \$300.0 million term loan and a \$450.0 million expansion option, subject to certain conditions. Borrowings are subject to a pricing grid, which can result in increases or decreases to the borrowing spread, depending on the Company's leverage ratio, ranging from 1.00% to 2.25% in the case of loans bearing interest at LIBOR and from 0.00% to 1.25% in the case of loans bearing interest at the base rate. As of May 31, 2016, the borrowing spread on LIBOR based borrowings was 2.00% (aggregating to a 2.44% variable rate borrowing cost). In addition, a non-use fee is payable quarterly on the average unused credit line under the revolver ranging from 0.15% to 0.35% per annum. As of May 31, 2016, the unused credit line under the revolver was \$592.1 million, of which \$183.0 million was available for borrowing. Quarterly term loan principal payments of \$3.8 million begin on June 30, 2016, and increase to \$7.5 million on June 30, 2017, with the remaining principal due at maturity. The Senior Credit Facility, which is secured by substantially all of the Company's domestic personal property assets, also contains customary limits and restrictions concerning investments, sales of assets, liens on assets, dividends and other payments. The two financial covenants included in the Senior Credit Facility agreement are a maximum leverage ratio of 3.75:1 and a minimum interest coverage ratio of 3.5:1. The Company was in compliance with all financial covenants at May 31, 2016.

On April 16, 2012, the Company issued \$300.0 million of 5.625% Senior Notes due 2022 (the "Senior Notes"), of which \$288.1 million remains outstanding at May 31, 2016 and August 31, 2015. The Senior Notes require no principal installments prior to their June 15, 2022 maturity, require semiannual interest payments in December and June of each year and contain certain financial and non-financial covenants. The Senior Notes include a call feature that allows the Company to repurchase them anytime on or after June 15, 2017 at stated redemption prices (ranging from 100.0% to 102.8%), plus accrued and unpaid interest.

Note 6. Fair Value Measurement

The Company assesses the inputs used to measure the fair value of financial assets and liabilities using a three-tier hierarchy. Level 1 inputs include quoted prices for identical instruments and are the most observable. Level 2 inputs include quoted prices for similar assets and observable inputs such as interest rates, foreign currency exchange rates, commodity rates and yield curves. Level 3 inputs are not observable in the market and include management's own judgments about the assumptions market participants would use in pricing an asset or liability.

Table of Contents

The fair value of the Company's cash and cash equivalents, foreign currency derivatives, accounts receivable, accounts payable and variable rate long-term debt approximated book value at both May 31, 2016 and August 31, 2015 due to their short-term nature and the fact that the interest rates approximated market rates. The fair value of the Company's outstanding Senior Notes was \$296.0 million and \$287.3 million at May 31, 2016 and August 31, 2015, respectively. The fair value of the Senior Notes was based on quoted inactive market prices and is therefore classified as Level 2 within the valuation hierarchy.

Note 7. Derivatives

The Company is exposed to market risk for changes in foreign currency exchange rates due to the global nature of its operations. In order to manage this risk the Company hedges certain portions of its recognized balances and forecasted cash flows that are denominated in non-functional currencies. All derivatives are recognized in the balance sheet at their estimated fair value. On the date it enters into a derivative contract, the Company designates the derivative as a hedge of a recognized asset or liability ("fair value hedge") or a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability ("cash flow hedge"). The Company does not enter into derivatives for speculative purposes. Changes in the value of fair value hedges and non-designated hedges are recorded in earnings along with the gain or loss on the hedged asset or liability, while changes in the value of cash flow hedges are recorded in accumulated other comprehensive loss, until earnings are affected by the variability of cash flows.

The U.S. dollar equivalent notional value of short duration foreign currency forward contracts (fair value hedges or non-designated hedges) was \$80.5 million and \$170.7 million, at May 31, 2016 and August 31, 2015, respectively. Net foreign currency gains (losses) related to these derivative instruments are as follows (in thousands):

	Three Months Ended May 31,		Nine Months Ended May 31,	
	2016	2015	2016	2015
Foreign currency gain (loss)	\$ (394)	\$ 2,310	\$ (1,028)	\$ 304

These derivative gains and losses offset foreign currency gains and losses from the related revaluation of non-functional currency assets and liabilities (amounts included in other income and expense in the condensed consolidated statement of earnings).

Note 8. Capital Stock and Share Repurchases

The Company's Board of Directors approved four separate authorizations (September 2011, March 2014, October 2014 and March 2015) to repurchase up to 7,000,000 shares per authorization of the Company's outstanding common stock. At May 31, 2016, shares repurchased under these authorizations totaled 20,326,479, leaving 7,673,521 shares available for repurchase under the existing share repurchase program.

The reconciliation between basic and diluted earnings (loss) per share is as follows (in thousands, except per share amounts):

	Three Months Ended May 31,		Nine Months Ended May 31,	
	2016	2015	2016	2015
Numerator:				
Net earnings (loss)	\$ 21,166	\$ 37,958	\$ (122,576)	\$ (2,206)
Denominator:				
Weighted average common shares outstanding - basic	58,923	59,617	59,034	61,911
Net effect of dilutive securities - stock based compensation plans ⁽¹⁾	666	626	—	—
Weighted average common shares outstanding - diluted	59,589	60,243	\$ 59,034	\$ 61,911
Basic earnings (loss) per share	\$ 0.36	\$ 0.64	\$ (2.08)	\$ (0.04)
Diluted earnings (loss) per share	0.36	0.63	(2.08)	(0.04)
Anti-dilutive securities from stock based compensation plans (excluded from earnings per share calculation)	1,930	2,256	4,973	4,662

⁽¹⁾ As a result of the impairment charges which caused a net loss in both the nine months ended May 31, 2016 and 2015, shares from stock based compensation plans are excluded from the calculation of diluted earnings (loss) per share, as the result would be anti-dilutive.

Note 9. Income Taxes

The Company's income tax expense is impacted by a number of factors, including the amount of taxable earnings derived in foreign jurisdictions with tax rates that are higher or lower than the U.S. federal statutory rate, permanent items, state tax rates and the ability to utilize various tax credits and net operating loss carryforwards. The Company's global operations, acquisition activity and specific tax attributes provide opportunities for continuous global tax planning initiatives to maximize tax credits and deductions. Both the current and prior periods include the benefits of tax planning initiatives. Comparative pre-tax earnings (loss), income tax expense (benefit) and effective income tax rates are as follows (amounts in thousands):

	Three Months Ended May 31,		Nine Months Ended May 31,	
	2016	2015	2016	2015
Earnings (loss) before income taxes	\$ 20,339	\$ 34,971	\$ (141,242)	\$ 4,579
Income tax (benefit) expense	(827)	(2,987)	(18,666)	6,785
Effective income tax rate	(4.1)%	(8.5)%	13.2%	148.2%

The third quarter effective income tax rates are impacted by the proportion of taxable earnings generated in foreign jurisdictions with tax rates lower than the U.S., the amount of tax benefits derived from annual tax planning initiatives and discrete income tax adjustments. The income tax benefit for the three months ended May 31, 2016 is the result of current year tax planning (related to the deductibility of foreign currency losses for tax purposes) and a \$2.3 million benefit from a discrete income tax adjustment (favorable provision to income tax return adjustments), which were partially offset by the provision for taxes due on current quarter earnings. The income tax benefit for the three months ended May 31, 2015 is the net result of a \$19.2 million reduction in tax reserves from the lapsing of income tax statutes of limitations and the favorable resolution of income tax audits, which were partially offset by the current quarter income tax provision, a \$5.0 million increase to the reserve for uncertain tax positions and a \$5.2 million increase in valuation allowances due to uncertainty regarding utilization of foreign net operating losses.

The comparability of year-to-date pre-tax income (loss), income tax expense (benefit) and the related effective income tax rate are impacted by impairment charges, as fiscal 2016 results include a \$186.5 million (\$169.1 million after tax) impairment charge, while the prior year included an \$84.4 million (\$82.6 million after tax) impairment charge. Excluding the impairment charge, the fiscal 2016 year-to-date effective tax rate is lower than the prior year due to a favorable mix of taxable earnings, the benefits of tax planning initiatives and discrete tax adjustments. Both the current and prior year income tax provisions include a similar income tax benefit from global tax planning initiatives; however the impact on the effective tax rate was substantially larger in the current year, as pre-tax earnings (excluding the impairment charge) were down \$43.7 million year-over-year. In addition, the tax provision for the nine months ended May 31, 2016 included 90% of earnings from foreign jurisdictions with tax rates lower than the U.S. federal income tax rate, compared to approximately 70% in the prior year, which had the impact of reducing the current year effective income tax rate.

Note 10. Segment Information

The Company is a global manufacturer of a broad range of industrial products and systems and is organized in three reportable segments: Industrial, Energy and Engineered Solutions. The Industrial segment is primarily engaged in the design, manufacture and distribution of branded hydraulic and mechanical tools to the maintenance, industrial, infrastructure and production automation markets. The Energy segment provides joint integrity products and maintenance services, customized offshore vessel mooring solutions, as well as rope and cable solutions to the global oil & gas, power generation and energy markets. The Engineered Solutions segment provides highly engineered position and motion control systems to original equipment manufacturers ("OEM") in various on and off-highway vehicle markets, as well as a variety of other products to the industrial and agricultural markets. The following tables summarize financial information by reportable segment and product line (in thousands):

	Three Months Ended May 31,		Nine Months Ended May 31,	
	2016	2015	2016	2015
Net Sales by Reportable Product Line & Segment:				
Industrial Segment:				
Industrial Tools	\$ 81,771	\$ 88,348	\$ 233,599	\$ 267,064
Integrated Solutions	13,980	15,198	32,210	35,384
	<u>95,751</u>	<u>103,546</u>	<u>265,809</u>	<u>302,448</u>
Energy Segment:				
Energy Maintenance & Integrity	73,377	62,644	210,762	182,985
Other Energy Solutions	27,923	36,653	90,526	128,044
	<u>101,300</u>	<u>99,297</u>	<u>301,288</u>	<u>311,029</u>
Engineered Solutions Segment:				
On-Highway	58,439	59,673	161,949	170,122
Agriculture, Off-Highway and Other	49,851	57,584	144,595	165,271
	<u>108,290</u>	<u>117,257</u>	<u>306,544</u>	<u>335,393</u>
	<u>\$ 305,341</u>	<u>\$ 320,100</u>	<u>\$ 873,641</u>	<u>\$ 948,870</u>
Operating Profit (Loss):				
Industrial	\$ 21,712	\$ 29,165	\$ 58,994	\$ 79,386
Energy ⁽¹⁾	10,870	12,774	(115,803)	(50,457)
Engineered Solutions ⁽²⁾	3,651	8,313	(37,943)	16,601
General Corporate	(7,890)	(7,250)	(23,649)	(20,757)
	<u>\$ 28,343</u>	<u>\$ 43,002</u>	<u>\$ (118,401)</u>	<u>\$ 24,773</u>

(1) Energy segment operating profit (loss) includes impairment charges of \$140.8 million and \$84.4 million for the nine months ended May 31, 2016 and 2015, respectively.

(2) Engineered Solutions segment operating profit (loss) includes an impairment charge of \$45.7 million for the nine months ended May 31, 2016.

	May 31, 2016	August 31, 2015
Assets by Segment:		
Industrial	\$ 299,971	\$ 293,738
Energy	508,660	601,521
Engineered Solutions	529,275	588,200
General Corporate	129,514	153,458
	<u>\$ 1,467,420</u>	<u>\$ 1,636,917</u>

In addition to the impact of foreign currency exchange rate changes, the comparability of segment and product line information is also impacted by acquisitions and impairment charges (Energy and Engineered Solutions segments). Corporate assets, which are not allocated, principally represent cash and cash equivalents, capitalized debt issuance costs and deferred income taxes.

Note 11. Contingencies and Litigation

The Company had outstanding letters of credit of \$19.1 million and \$18.1 million at May 31, 2016 and August 31, 2015, respectively, the majority of which relate to commercial contracts and self-insured workers compensation programs.

The Company is a party to various legal proceedings that have arisen in the normal course of business. Such proceedings typically include product liability, environmental, labor, patent claims and other disputes. The Company has recorded reserves for loss contingencies based on the specific circumstances of each case. Such reserves are recorded when it is probable that a loss has been incurred as of the balance sheet date and can be reasonably estimated. In the opinion of management, the resolution of these contingencies, individually and in the aggregate, are not expected to have a material adverse effect on the Company's financial condition, results of operations or cash flows.

The Company has facilities in numerous geographic locations that are subject to a range of environmental laws and regulations. Environmental expenditures over the past two years have not been material. Management believes that such costs will not have a material adverse effect on the Company's financial position, results of operations or cash flows.

The Company remains contingently liable for lease payments of businesses that it previously divested or spun-off, in the event that such businesses are unable to fulfill their lease payment obligations. The discounted present value of future minimum lease payments for these leases was \$16.3 million at May 31, 2016.

Note 12. Guarantor Subsidiaries

As discussed in Note 5, "Debt" on April 16, 2012, Actuant Corporation (the "Parent") issued \$300.0 million of 5.625% Senior Notes, of which \$288.1 million remains outstanding as of May 31, 2016. All of our material domestic wholly owned subsidiaries (the "Guarantors") fully and unconditionally guarantee the 5.625% Senior Notes on a joint and several basis. There are no significant restrictions on the ability of the Guarantors to make distributions to the Parent. The following tables present the results of operations, financial position and cash flows of Actuant Corporation and its subsidiaries, the Guarantor and non-Guarantor entities, and the eliminations necessary to arrive at the information for the Company on a consolidated basis.

Certain assets, liabilities and expenses have not been allocated to the Guarantors and non-Guarantors and therefore are included in the Parent column in the accompanying condensed consolidating financial statements. These items are of a corporate or consolidated nature and include, but are not limited to, tax provisions and related assets and liabilities, certain employee benefit obligations, prepaid and accrued insurance and corporate indebtedness. Intercompany activity primarily includes loan activity, purchases and sales of goods or services, investments and dividends. Intercompany balances also reflect certain non-cash transactions including transfers of assets and liabilities between the Parent, Guarantor and non-Guarantor, allocation of non-cash expenses from the Parent to the Guarantors and non-Guarantors, non-cash intercompany dividends and the impact of foreign currency rate changes.

Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

Actuant Corporation, headquartered in Menomonee Falls, Wisconsin, is a Wisconsin corporation and was incorporated in 1910. We are a global diversified company that designs, manufactures and distributes a broad range of industrial products and systems to various end markets. The Company is organized into three operating segments: Industrial, Energy and Engineered Solutions. The Industrial segment is primarily involved in the design, manufacture and distribution of branded hydraulic and mechanical tools to the maintenance, industrial, infrastructure and production automation markets. The Energy segment provides joint integrity products and services, customized offshore vessel mooring solutions, as well as rope and cable solutions to the global oil & gas, power generation and other energy markets. The Engineered Solutions segment provides highly engineered position and motion control systems to original equipment manufacturers (“OEM”) in various on and off-highway vehicle markets, as well as a variety of other products to the industrial and agricultural markets. Financial information related to the Company's segments is included in Note 10, "Segment Information" in the notes to the condensed consolidated financial statements.

Our businesses provide an array of products and services across multiple markets and geographies which results in significant diversification. Sales in most of our end markets are expected to remain sluggish during the remainder of the fiscal year given the challenging and inconsistent demand we have experienced in most served markets including industrial, mining, infrastructure, oil & gas, commercial and off-highway vehicles and agriculture. Excluding the impact of acquisitions and foreign currency rate changes ("core sales"), we expect fourth quarter fiscal 2016 consolidated core sales to decline 9-10% from the prior year. As a result of these and other factors, we have implemented various cost reduction programs across all three segments to reduce the impact of lower customer demand on our profitability. We expect to incur \$25 million of restructuring charges in fiscal 2016 and 2017 to simplify our organizational structure and reduce our fixed costs. Financial results for the nine months ended May 31, 2016 include \$11 million of restructuring costs to consolidate facilities, reduce global headcount and simplify our businesses. We remain focused on maintaining our financial position and flexibility by adjusting our cost structure to reflect changes in demand levels and by proactively managing working capital and cash flow generation.

Given our global geographic footprint, changes in foreign currency exchange rates could have a significant impact on our financial results, financial position and cash flow. Changes in foreign currency exchange rates will continue to add volatility as slightly over one-half of our sales are generated outside of the United States in currencies other than the U.S. dollar. The strengthening of the U.S. dollar unfavorably impacts our sales, cash flow and earnings given the translation of our international results into U.S. dollars. This also results in higher costs for certain international operations which incur costs or purchase components in U.S. dollars and reduces the dollar value of assets (including cash) and liabilities of our international operations included in our consolidated balance sheet.

Despite short-term challenges from weak end market demand and foreign currency headwinds, we continue to believe that our targeted energy, infrastructure, food/farm productivity and natural resources/sustainability strategies provide attractive long-term opportunities for sustainable growth. The long-term sales growth and profitability of our business is also dependent on our ability to identify, consummate and integrate strategic acquisitions, develop and market innovative new products, expand our business activity geographically and our ability to achieve operational excellence. Our priorities during the remainder of fiscal 2016 include continued execution of restructuring activities, managing costs and improving operational execution and investments in growth initiatives.

[Table of Contents](#)

Results of Operations

The following table sets forth our results of operations (in millions, except per share amounts):

	Three Months Ended May 31,				Nine Months Ended May 31,			
	2016		2015		2016		2015	
Net sales	\$ 305	100 %	\$ 320	100 %	\$ 874	100 %	\$ 949	100 %
Cost of products sold	198	65 %	202	63 %	567	65 %	594	63 %

Diluted earnings (loss) per share	\$ 0.36		\$ 0.63		\$ (2.08)		\$ (0.04)	

Consolidated sales for the third quarter were \$305 million, 5% lower than the prior year, while year-to-date sales were \$874 million, a decrease of 8% from the prior year. Core sales for three and nine months ended May 31, 2016 were down 5% and 6% respectively, as a result of challenging end market conditions, including weak general industrial activity, reduced capital spending by customers in the global energy markets and lower demand and inventory destocking by OEMs in off-highway vehicles, mining, agriculture and other markets. The resulting lower production levels and absorption of manufacturing costs, as well as unfavorable sales mix and restructuring charges (as we adjust our cost structure by consolidating facilities and reducing headcount) resulted in reduced operating profit margins. Changes in foreign currency exchange rates unfavorably impacted sales comparisons by \$3 million and \$40 million for the three and nine months ended May 31, 2016 while current year acquisitions added sales of \$7 million in fiscal 2016. Year-to-date fiscal 2016 and 2015 results include impairment charges related to the write-down of the acquired goodwill, intangible assets and long-lived assets of certain of our businesses. Fiscal 2016 financial results also include a lower effective income tax rate and fewer shares outstanding compared to the prior year.

Segment Results

Industrial Segment

The Industrial segment is a global supplier of branded hydraulic and mechanical tools to a broad array of end markets, including general maintenance and repair, industrial, oil & gas, mining, infrastructure and production automation. Its primary products include high-force hydraulic tools, production automation solutions and concrete stressing components and systems (collectively "Industrial Tools") and highly engineered heavy lifting solutions ("Integrated Solutions"). The following table sets forth the results of operations for the Industrial segment (in millions):

	Three Months Ended May 31,		Nine Months Ended May 31,	
	2016	2015	2016	2015
Net sales	\$ 96	\$ 104	\$ 266	\$ 302
Operating profit	22	29	59	79
Operating profit %	22.7 %	28.2 %	22.2 %	26.2 %

Industrial segment third quarter sales were \$96 million, which was 8% below the prior year period, while year-to-date sales were \$266 million, 12% lower than the prior year. Third quarter core sales were down 9%, and exclude a 2% benefit from the recent Larzep acquisition (\$2 million of sales) and a 1% headwind from changes in foreign currency exchange rates. While the quarterly year-over-year core sales trend improved sequentially from -14% to -9%, reduced global industrial activity, challenging end market

Table of Contents

conditions and cautious spending patterns by customers for heavy lifting and large infrastructure projects have continued. Operating profit margins were 22.7% in the third quarter of fiscal 2016 compared to 28.2% in the prior year period. Lower production levels due to planned inventory reductions (absorption of fixed costs), unfavorable sales mix (which reduced margins by 125 basis points in the quarter), as well as restructuring charges of \$1 million resulted in lower operating profit margins in fiscal 2016.

Energy Segment

The Energy segment provides products and maintenance services to the global energy markets, where safety, reliability, up-time and productivity are key value drivers. Products include joint integrity tools and connectors for oil & gas and power generation installations and high performance ropes, cables and umbilicals. In addition to these products, the Energy segment also provides mooring systems and joint integrity tools under rental arrangements, as well as technical manpower solutions. The following table sets forth comparative results of operations for the Energy segment (in millions):

	Three Months Ended May 31,		Nine Months Ended May 31,	
	2016	2015	2016	2015
Net sales	\$ 101	\$ 99	\$ 301	\$ 311
Operating profit (loss)	11	13	(116)	(50)
Operating profit %	10.7%	12.9%	(38.4)%	(16.2)%

Energy segment year-over-year core sales flattened in the third quarter after a strong first half of the fiscal year, resulting in 2% core sales growth for the first nine months of the fiscal 2016. Changes in foreign currency exchange rates unfavorably impacted sales comparisons by \$3 million and \$21 million for the three and nine months ended May 31, 2016, respectively, while the recent pipeline and process services acquisition added \$5 million of sales to the third quarter. Core sales from our Energy Maintenance & Integrity product line increased \$7 million (12%) in the third quarter, the result of continued strong demand for technical manpower services on maintenance projects and a large subsea connector order. However, core sales in our Other Energy Solutions product line, consisting of umbilical & rope solutions and offshore mooring, declined \$7 million (21%) year-over-year due to the continued impact of reduced customer spending on exploration, drilling and commissioning activities and pricing pressures. Energy segment operating profit for the third quarter was \$11 million and \$13 million for fiscal 2016 and 2015, respectively. Unfavorable sales mix which reduced margins by 335 basis points due to sharply higher service revenue and reduced mooring rental activity and \$2 million of restructuring expenses were somewhat offset by savings from previously completed restructuring actions. The operating loss for the nine months ended May 31, 2016 and 2015 includes impairment charges of \$141 million and \$84 million, respectively.

Engineered Solutions Segment

The Engineered Solutions segment is a global designer and assembler of customized position and motion control systems and other industrial products to various vehicle and other niche markets. The segment focuses on providing technical and highly engineered products, including actuation systems, mechanical power transmission products, engine air flow management systems, human to machine interface solutions and other rugged electronic instrumentation. The following table sets forth comparative results of operations for the Engineered Solutions segment (in millions):

	Three Months Ended May 31,		Nine Months Ended May 31,	
	2016	2015	2016	2015
Net sales	\$ 108	\$ 117	\$ 307	\$ 335
Operating profit (loss)	4	8	(38)	17
Operating profit %	3.4%	7.1%	(12.4)%	4.9%

Fiscal 2016 third quarter Engineered Solutions segment net sales decreased \$9 million (8%) year-over-year to \$108 million, while year-to-date sales decreased \$28 million (9%) year-over-year to \$307 million. Excluding foreign currency rate changes, which unfavorably impacted sales comparison by \$12 million year-to-date, core sales declined 8% and 5% for the three and nine months ended May 31, 2016, respectively. Recent core sales declines were the result of reduced build rates by OEMs to reduce inventory levels, coupled with unfavorable market conditions in off-highway vehicles and agriculture markets. Operating profit margins for the third quarter were adversely impacted by unfavorable product mix and reduced absorption on lower production volumes and inventory reduction efforts. Restructuring costs to consolidate facilities and reduce headcount were \$1 million and \$5 million, for the three and nine months ended May 31, 2016, respectively. The operating loss for the nine months ended May 31, 2016 included \$46 million impairment charge.

[Table of Contents](#)

Corporate

Corporate expenses increased \$1 million in the third quarter and \$3 million year-to-date compared to the prior year. On a year-to-date basis corporate expenses increased due to higher acquisition and incentive compensation expenses, partially offset by cost reduction benefits.

Financing Costs, net

Net financing costs were \$7 million and \$21 million for each of the comparative three and nine months ended May 31, 2016 and 2015, respectively.

Income Taxes Expense

Comparative pre-tax loss, income tax expense (benefit) and effective income tax rates are as follows (in millions):

	Three Months Ended May 31,		Nine Months Ended May 31,	
	2016	2015	2016	2015
Loss before income taxes	\$ 20	\$ 35	\$ (141)	\$ 5
Income tax (benefit) expense	(1)	(3)	(19)	7
Effective income tax rate	(4.1)%	(8.5)%	13.2%	148.2%

The third quarter effective income tax rates are impacted by the proportion of taxable earnings generated in foreign jurisdictions with tax rates lower than the U.S., the amount of tax benefits derived from annual tax planning initiatives and discrete income tax adjustments. The income tax benefit for the three months ended May 31, 2016 is the result of current year tax planning (related to the deductibility of foreign currency losses for tax purposes) and a \$2 million benefit from discrete income tax adjustments (favorable provision to income tax return adjustments), which were partially offset by the provision for taxes due on current quarter earnings. The income tax benefit for the three months ended May 31, 2015 is the net result of a \$19 million reduction in tax reserves from the lapsing of income tax statutes of limitations and the favorable resolution of income tax audits, which were partially offset by the current quarter income tax provision, a \$5 million increase to the reserve for uncertain tax positions and a \$5 million increase in valuation allowances due to uncertainty regarding utilization of foreign net operating losses.

The comparability of year-to-date pre-tax income (loss), income tax expense (benefit) and the related effective income tax rate are impacted by impairment charges, as fiscal 2016 results include a \$187 million (\$169 million after tax) impairment charge, while the prior year included an \$84 million (\$83 million after tax) impairment charge. Excluding the impairment charge, the fiscal 2016 year-to-date effective tax rate is lower than the prior year due to a favorable mix of taxable earnings, the benefits of tax planning initiatives and discrete tax adjustments. Both the current and prior year income tax provisions included a similar sized income tax benefit from global tax planning initiatives; however the impact on the effective tax rate was substantially larger in the current year, as year to date pre-tax earnings (excluding the impairment charge) were \$44 million lower in fiscal 2016. In addition, the tax provision for the nine months ended May 31, 2016 included 90% of earnings from foreign jurisdictions with tax rates lower than the U.S. federal income tax rate compared to approximately 70% in the prior year, which had the impact of reducing the current year effective income tax rate.

Cash Flows and Liquidity

At May 31, 2016, cash and cash equivalents included \$129 million of cash held by our foreign locations and \$8 million held domestically. We periodically utilize income tax safe harbor provisions to make temporary short-term intercompany advances from our foreign subsidiaries to our U.S. parent, including \$91 million and \$160 million at May 31, 2016 and August 31, 2015, respectively. The following table summarizes our cash flows from operating, investing and financing activities (in millions):

	Nine Months Ended May 31,	
	2016	2015
Net cash provided by operating activities	\$ 75	\$ 44
Net cash used in investing activities	(88)	(16)
Net cash (used in) provided by financing activities	(12)	4
Effect of exchange rates on cash	(7)	(32)
Net decrease in cash and cash equivalents	\$ (32)	\$ —

Cash flows from operating activities were \$75 million for the nine months ended May 31, 2016, an increase of \$31 million compared to the prior year due to a \$21 million reduction in income tax payments and improved working capital management. Cash

[Table of Contents](#)

flows from operations, proceeds from the sale leaseback of several facilities and existing cash balances were utilized to repurchase 600,000 shares of common stock (\$14 million) and fund the FourQuest and Larzep acquisitions (\$81 million of capital deployed) and \$16 million of capital expenditures.

Cash flows from operating activities of \$44 million were lower during the nine months ended May 31, 2015, primarily the result of higher income tax payments (partially attributable to fiscal 2014 divestitures) and a \$24 million increase in working capital. Borrowings under the our Senior Credit Facility funded the repurchase of approximately 7 million shares (\$205 million) of the Company's common stock.

Our Senior Credit Facility, which matures on May 8, 2020, includes a \$600 million revolver, a \$300 million term loan and a \$450 million expansion option. Quarterly term loan principal payments of \$4 million begin on June 30, 2016, increasing to \$8 million per quarter beginning on June 30, 2017, with the remaining principal due at maturity. At May 31, 2016, the unused credit line under the revolver was \$592 million, of which \$183 million was available for borrowing. We believe the \$137 million of cash on hand, revolver availability and future operating cash flow will be adequate to meet operating, acquisition funding, debt service, stock buyback and capital expenditure requirements for the foreseeable future.

Primary Working Capital Management

We use primary working capital as a percentage of sales (PWC %) as a key metric of working capital management. We define this metric as the sum of net accounts receivable and net inventory less accounts payable, divided by the past three months sales annualized. The following table shows a comparison of primary working capital (in millions):

	May 31, 2016	PWC%	August 31, 2015	PWC%
Accounts receivable, net	\$ 200	16 %	\$ 193	16 %
Inventory, net	138	11 %	143	12 %
Accounts payable	(120)	(10)%	(118)	(10)%
Net primary working capital	\$ 218	18 %	\$ 218	18 %

Commitments and Contingencies

We have operations in numerous geographic locations that are subject to a range of environmental laws and regulations. Environmental expenditures over the past two years have not been material and we believe that such costs will not have a material adverse effect on our financial position, results of operations or cash flows.

We remain contingently liable for lease payments of businesses that were previously divested or spun-off, in the event that such businesses are unable to fulfill their future lease payment obligations. The discounted present value of future minimum lease payments for these leases was \$16 million at May 31, 2016.

We had outstanding letters of credit of approximately \$19 million and \$18 million at May 31, 2016 and August 31, 2015, respectively, the majority of which relate to commercial contracts and self-insured workers compensation programs.

Contractual Obligations

Our contractual obligations have not materially changed in fiscal 2016 and are discussed in Part 1, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" under the heading "Contractual Obligations" in our Annual Report on Form 10-K for the year ended August 31, 2015.

Critical Accounting Policies

Refer to the Critical Accounting Policies in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in the Annual Report on Form 10-K for the year-ended August 31, 2015 for information about the Company's policies, methodology and assumptions related to critical accounting policies.

Goodwill Impairment Review, Estimates and Sensitivity: Our business acquisitions typically result in goodwill and other intangible assets, which are a significant portion of our total assets. On an annual basis, or more frequently if triggering events occur, we compare the estimated fair value of our reporting units to the carrying value to determine if a potential goodwill impairment exists. If the fair value of a reporting unit is less than its carrying value, an impairment loss, if any, is recorded for the difference between the implied fair value and the carrying value of the reporting unit's goodwill. In estimating the fair value of a reporting unit, we generally use a discounted cash flow model, which is dependent on a number of assumptions including estimated future revenues and expenses, weighted average cost of capital, capital expenditures and other variables. The expected future revenue growth rates and operating profit margins are determined after taking into consideration our historical revenue growth rates and earnings levels.

our assessment of future market potential and our expectations of future business performance. Under the discounted cash flow approach, the fair value is calculated as the sum of the projected discounted cash flows over a discrete seven year period plus an estimated terminal value.

During the second quarter of fiscal 2016, we determined that there were interim “triggering events” that required a review of the recoverability of the long-lived assets, intangible assets and goodwill of three reporting units (Cortland, Viking and maximatecc).

Cortland and Viking Reporting Units: The Cortland business (acquired in September 2008) develops highly-engineered rope and cable solutions that maximize performance, safety and efficiency for customers in various markets including offshore oil & gas, heavy marine lift, ROV and seismic. The Viking business was acquired in August 2013 and provides customers with a comprehensive range of marine mooring equipment and services (inspection, design and installation) to meet the demands of offshore energy assets. Customer demand at these Energy segment businesses is susceptible to changes in oil & gas prices and capital spending patterns by global energy customers. Unfavorable market conditions, including continued cuts in oil & gas capital spending, reduced exploration, drilling and commissioning activities and excess capacity for mooring rental assets, resulted in a 33% core sales decline in the second quarter of fiscal 2016 at Viking and Cortland, which comprise our Other Energy Services product line. As a result of lower projected sales and profits, we recognized an impairment charge of \$141 million during the second quarter of fiscal 2016. The impairment charge consisted of \$74 million of goodwill, \$16 million of indefinite lived intangibles (tradenames), \$28 million of amortizable intangible assets and \$24 million of fixed assets (primarily Viking rental assets).

While we believe that the Energy segment's diverse products and services will generate positive cash flow and earnings in the long-term, the financial projections utilized in the interim impairment review were based on historical trends and incorporate current unfavorable market conditions and reduced expectations regarding future sales growth, including 3.0% in the terminal year. Estimated future cash flows from the Cortland business assume single digit core sales decline through fiscal 2017, following a 20% sales decline in fiscal 2015. Decisions by asset owners to significantly reduce exploration and drilling activities, have resulted in reduced near term sales expectations for Viking (projecting sales declines through fiscal 2017). Despite actions to adjust our cost structure for current sales volumes, near-term estimated future cash flows from Viking are expected to be challenged given the fixed cost nature of the business (rent and depreciation expense on rental assets).

The future financial results of these reporting units are dependent on a) the realization of savings from restructuring actions to consolidate facilities and reduce fixed overhead, b) the level of offshore exploration and drilling activity and c) our ability to retain or win new business in a market that currently has excess capacity. The assumptions that have the most significant impact on determination of the fair value of the Cortland and Viking reporting units are the discount rate (11.2% at February 29, 2016) and sales growth rate. A 100 basis point increase in the discount rate results in a reduction to the estimated fair value of each reporting unit by approximately 12% for Cortland and 6% for Viking, while a reduction in the terminal year sales growth rate assumption by 100 basis points would decrease the estimated fair value by approximately 8% for both Cortland and Viking.

Maximatecc Reporting Unit: The maximatecc reporting unit, including the legacy North American business and acquisitions of CrossControl (Europe) and Turotest (South America), manufactures severe-duty electronic instrumentation including displays and clusters, machine controls and sensors. These products are primarily marketed to industrial vehicle original equipment manufacturers (“OEMs”) and system suppliers in a number of industries, including industrial, material hauling, construction, agriculture, forestry, mining, utility, cargo, marine and rail. Weakness in off-highway vehicle and agricultural markets, coupled with weak overall industrial fundamentals, recent OEM inventory destocking and delays in the launch of new models have resulted in reduced sales and profitability of the business. Financial projections for the business now assume core sales declines in fiscal 2016 and 2017, with a rebound to core sales growth in fiscal 2018 (driven by ramp up to full production volumes on new platform wins) and improved profitability in future years, driven by higher sales volume and the benefit of restructuring actions.

Future sales and profits of the maximatecc business are subject to OEM production levels that may change in response to end market conditions in industrial and off-highway markets. Specific market factors include the adoption rate of human to machine interface (“HMI”) technology as “options” on off-highway equipment, the level of new and used inventory at dealers and in the field, commodity pricing which impacts end-user demand and the timing and pace to full production volumes for recent new OEM platform wins. The assumptions that have the most significant impact on the determination of the fair value of the reporting unit are the discount rate (10.5% at February 29, 2016) and sales growth rates (3% in the terminal year). A 100 basis point increase in the discount rate results in a decrease to the estimated fair values by approximately 15%, while a reduction in the terminal year sales growth rate assumption by 100 basis points would decrease the estimated fair values by approximately 11%.

Indefinite-lived intangibles (tradenames): Indefinite lived intangible assets are also subject to annual impairment testing. On an annual basis or more frequently if a triggering event occurs, the fair value of indefinite lived assets, based on a relief of royalty valuation approach, are evaluated to determine if an impairment charge is required. In the second quarter of fiscal 2016 we recognized a \$17 million impairment of the Viking, Cortland and maximatecc tradenames, the result of lower projected sales and profits. The valuation models assume reduced sales projections and royalty rates of 1.0%-1.5%, which reflected current and future profitability estimates and were lower than previous estimates.

Table of Contents

Long-lived assets (fixed assets and amortizable intangible assets): We also review long-lived assets for impairment when events or changes in business circumstances indicate that the carrying amount of the assets may not be fully recoverable. If such indicators are present, we prepare an undiscounted operating cash flow analyses to determine if an impairment exists. If an impairment is determined to exist, any related impairment loss is calculated based on fair value. The undiscounted operating cash flow analyses for Cortland and maximatecc exceeded the carrying value and therefore there was no impairment of fixed assets or amortizable intangible assets at February 29, 2016. However, the undiscounted operating cash flows of Viking did not exceed the carrying value and therefore a \$52 million impairment to long-lived assets was recognized in the second quarter of fiscal 2016, including \$28 million of amortizable intangible assets and \$24 million of fixed assets (primarily rental assets).

A considerable amount of management judgment and assumptions are required in performing the impairment tests, principally in determining the fair value of each reporting unit and the indefinite lived intangible assets. While we believe our judgments and assumptions are reasonable, different assumptions could change the estimated fair values and, therefore, future additional impairment charges could be required. Weakening industry or economic trends, disruptions to our business, loss of significant customers, inability to effectively integrate acquired businesses, unexpected significant changes or planned changes in the use of the assets or in entity structure and divestitures may adversely impact the assumptions used in the valuations and ultimately result in future impairment charges.

Item 3 – Quantitative and Qualitative Disclosures about Market Risk

The diverse nature of our business activities necessitates the management of various financial and market risks, including those related to changes in interest rates, foreign currency exchange rates and commodity costs.

Interest Rate Risk: We manage interest expense using a mixture of fixed-rate and variable-rate debt. A change in interest rates impacts the fair value of our 5.625% Senior Notes, but not our earnings or cash flow because the interest rate on such debt is fixed. Our variable-rate debt obligations consist primarily of revolver and term loan borrowings under our Senior Credit Facility. A ten percent increase in the average cost of our variable rate debt (from 2.44% to 2.68%) would have resulted in a corresponding \$0.3 million and \$0.8 million increase in financing costs for the three and nine months ended May 31, 2016, respectively.

Foreign Currency Risk: We maintain operations in the U.S. and various foreign countries. Our more significant non-U.S. operations are located in Australia, the Netherlands, the United Kingdom, Mexico and China, and have foreign currency risk relating to receipts from customers, payments to suppliers and intercompany transactions denominated in foreign currencies. Under certain conditions, we enter into hedging transactions (primarily forward foreign currency swaps) that enable us to mitigate the potential adverse impact of foreign currency exchange rate risk (see Note 7, “Derivatives” for further information). We do not engage in trading or other speculative activities with these transactions, as established policies require that these hedging transactions relate to specific currency exposures.

Similar to what we experienced during the last eighteen months, the strengthening of the U.S. dollar against most currencies can have an unfavorable impact on our results of operations and financial position as foreign denominated operating results are translated into U.S. dollars. To illustrate the potential impact of changes in foreign currency exchange rates on the translation of our results of operations, quarterly sales and operating profit were remeasured assuming a ten percent decrease in all foreign exchange rates compared with the U.S. dollar. Using this assumption, quarterly sales would have been lower by \$16 million and operating profit would have been lower by \$2 million, respectively, for the three months ended May 31, 2016. This sensitivity analysis assumes that each exchange rate would change in the same direction relative to the U.S. dollar and excludes the potential effects that changes in foreign currency exchange rates may have on sales levels or local currency prices. Similarly, a ten percent decline in foreign currency exchange rates on our May 31, 2016 financial position would have resulted in a \$22 million reduction to equity (accumulated other comprehensive loss), as a result of non U.S. dollar denominated assets and liabilities being translated into U.S. dollars, our reporting currency.

Commodity Cost Risk: We source a wide variety of materials and components from a network of global suppliers. While such materials are typically available from numerous suppliers, commodity raw materials, such as steel and plastic resin, are subject to price fluctuations, which could have a negative impact on our results. We strive to pass along such commodity price increases to customers to avoid profit margin erosion.

Item 4 – Controls and Procedures

Evaluation of Disclosure Controls and Procedures.

Under the supervision and with the participation of our senior management, including our chief executive officer and chief financial officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), as of the end of the period covered by this quarterly report (the “Evaluation Date”). Based on this evaluation, our chief executive officer and chief financial officer concluded as of the Evaluation Date that our disclosure controls and procedures were

[Table of Contents](#)

effective such that the information relating to the Company, including consolidated subsidiaries, required to be disclosed in our Securities and Exchange Commission (“SEC”) reports (i) is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to the Company’s management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). There have been no changes in our internal control over financial reporting that occurred during the quarter ended May 31, 2016 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

PART II—OTHER INFORMATION

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

The Company's Board of Directors has authorized the repurchase of shares of the Company's common stock under publicly announced share repurchase programs. Since the inception of the initial share repurchase program in fiscal 2012, the Company has repurchased 20,326,479 shares of common stock (over 25% of its then outstanding shares) for \$615 million. The following table summarizes share repurchases during the three months ended May 31, 2016:

	Total Number of Shares Purchased	Average Price Paid per Share	Maximum Number of Shares That May Yet Be Purchased Under the Program
March 1 to March 31, 2016	200,000	\$ 23.84	7,673,521
April 1 to April 30, 2016	—	—	7,673,521
May 1 to May 31, 2016	—	—	7,673,521
	<u>200,000</u>	<u>\$ 23.84</u>

CERTIFICATION

I, Randal W. Baker, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Actuant Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting
